Testing

2 high level test
1. Should be able to use lowercase in every type box
   Result: states can not be in lowercase, they show it as an error.
2. Should be able to leave some objects empty in the type boxes
   Result: are able to leave empty the non-req empty but if filled in one you have to fill the rest.

2 low level test
1. If all req are fill submit should work
   Result: was unable to use submit in canceled warrant. It would give error of needing an optional field which there are none.
2. If all clear buttons work.
   Result: the clear buttons work as intended with clearing all text and dates that were put in.

- *1 smoke/sanity test (basic run through of the whole site)*

Main issues were the only caps for states and canceled warrant count not submit but the x button when choosing with one of the 3 to go into is in the side a little to much and is hard to see for that.
